CAMPAIGN PERFORMANCE PORTFOLIO

Multi-Brand Portfolio · Selected Campaign Period

Live paid media performance across five concurrent brand accounts — each with its own budget, audience, and commercial objective. A 23-day active window compared against the prior equivalent. Real numbers. Real results.

PORTFOLIO AGGREGATE · 23-DAY PERIOD

TOTAL AD REVENUE	TOTAL ORDERS	AVG ROAS	AVG ACOS
INR 531.82K	**1,019**	**4.9x**	**20.8%**
▲ +41.1% vs prior	▲ +57.8% vs prior	▲ +12.4% vs prior	▼ Improving

All figures sourced directly from live campaign dashboards.

CAMPAIGN 01

Brand A — Efficiency Optimisation

Category: Apparel & Lifestyle · Objective: ACOS Reduction & ROAS Growth

AD REVENUE	AD SPEND	ACOS	ROAS
INR 58.46K	**INR 15.16K**	**25.94%**	**3.86x**
▲ +9.59% vs prior	▼ -5.21% vs prior	▼ -13.51% vs prior	▲ +15.62% vs prior
INR 53.34K	INR 16K	29.99%	3.33x

Source: Live Campaign Dashboard · Selected Period · Live data

PERFORMANCE ANALYSIS

Okay so look at this — ACOS was sitting at 29.99% when I came in. That is way too high. So the first thing I did was go after the keywords that were eating budget but not converting. Cut the broad match waste, pushed harder on exact and phrase match where the purchase intent was actually there. See what happened — spend went DOWN 5.2% and revenue went UP 9.6%. Same account, just cleaner. ROAS moved from 3.33x to 3.86x. ACOS dropped to 25.94%. This account is on a steady path now — every week it is getting tighter.

CAMPAIGN 02

Brand B — High-Efficiency Performance

Category: Apparel & Lifestyle · Objective: Revenue Growth at Low ACOS

AD REVENUE	ACOS	ROAS	ORDERS
INR 62.46K	**15.62%**	**6.4x**	**130**
▲ +8.3% vs prior	▼ -8.54% vs prior	▲ +9.34% vs prior	▲ +4.84% vs prior
INR 57.67K	17.08%	5.85x	124

Source: Live Campaign Dashboard · Selected Period · Live data

PERFORMANCE ANALYSIS

This one — look at the ROAS — 6.4x. That is the best performing account in the whole portfolio. And here is the thing, I did not scale spend to get there. I kept spend flat and just made the existing budget work harder. How? Negative keyword cleanup, dayparting based on when conversions were actually happening, and just protecting what was already working. ACOS is at 15.62% — well below the efficiency threshold. Revenue grew 8.3%. Some accounts you scale, some you just protect. This one needed protection. That is what I did.

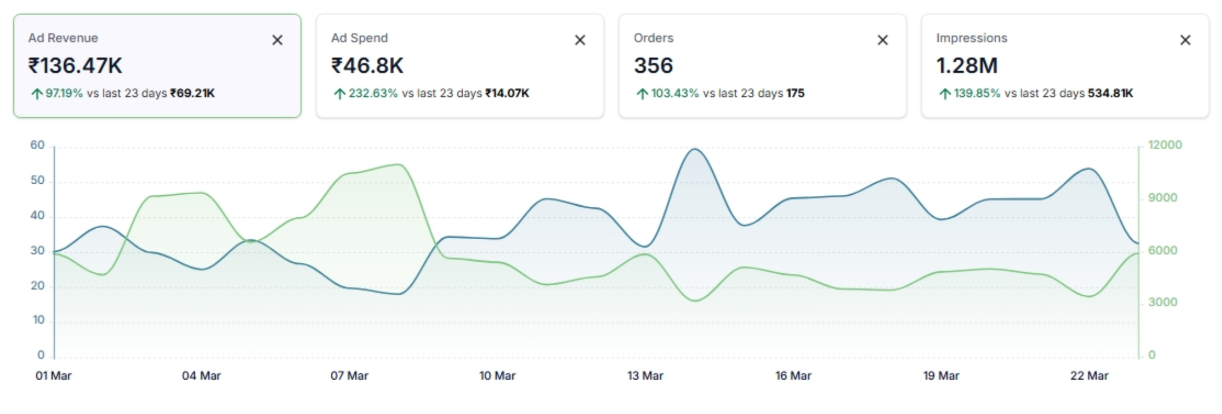
CAMPAIGN 03

Brand C — Scale Activation Campaign

Category: Apparel & Lifestyle · Objective: Revenue Scale & Impression Growth

AD REVENUE	AD SPEND	ORDERS	IMPRESSIONS
INR 136.47K	**INR 46.8K**	**356**	**1.28M**
▲ +97.19% vs prior	▲ +232.63% vs prior	▲ +103.43% vs prior	▲ +139.85% vs prior
INR 69.21K	INR 14.07K	175	534.81K

Source: Live Campaign Dashboard · Selected Period · Live data



PERFORMANCE ANALYSIS

See this one was a scale push — I knew the window was there so I tripled the budget. INR 14K to INR 46.8K. Sounds aggressive right? But look at what came back. Revenue nearly doubled — +97.19%. Orders more than doubled — from 175 to 356. Impressions went from 534K to 1.28 million. And the whole time I was watching ACOS daily to make sure we were not just burning money. This is what a controlled scale push looks like — you go hard, but you go with your eyes open.

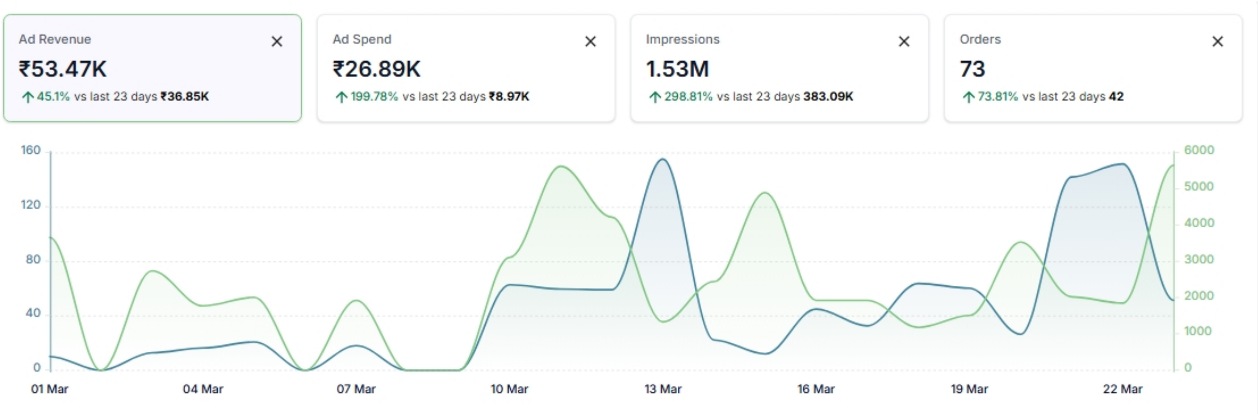
CAMPAIGN 04

Brand D — Awareness & Acquisition Drive

Category: Apparel & Lifestyle · Objective: Impression Scale & Order Growth

AD REVENUE	AD SPEND	IMPRESSIONS	ORDERS
INR 53.47K	**INR 26.89K**	**1.53M**	**73**
▲ +45.1% vs prior	▲ +199.78% vs prior	▲ +298.81% vs prior	▲ +73.81% vs prior
INR 36.85K	INR 8.97K	383.09K	42

Source: Live Campaign Dashboard · Selected Period · Live data



PERFORMANCE ANALYSIS

This account was not about short-term ROAS — it was about getting in front of new people. Look at the impressions — 383K to 1.53M. Nearly 4x. That is a lot of new eyeballs on this brand. Yes, spend went up a lot. But that was the brief — awareness first, conversion second. Orders still went up 73.8% which is honestly better than expected for a top-of-funnel push. I kept a hard budget ceiling on this one and reviewed pacing every week so it never ran away. The new audiences from this campaign are now feeding the retargeting — that is where the payoff comes.

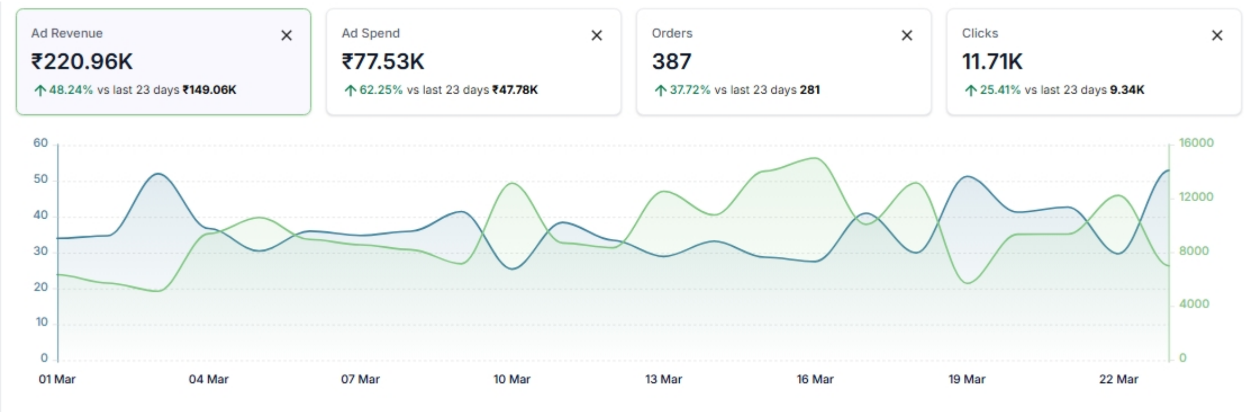
CAMPAIGN 05

Portfolio Overview — Consolidated Performance

Multi-Brand Portfolio View · Objective: Revenue Growth & Click Quality

AD REVENUE	AD SPEND	ORDERS	CLICKS
INR 220.96K	INR 77.53K	387	11.71K
▲ +48.24% vs prior	▲ +62.25% vs prior	▲ +37.72% vs prior	▲ +25.41% vs prior
INR 149.06K	INR 47.78K	281	9.34K

Source: Live Campaign Dashboard · Selected Period · Live data



PERFORMANCE ANALYSIS

Okay so here is the full picture — all five accounts together. Revenue up 48.2% to INR 220.96K. Orders up from 281 to 387. Now here is what I want you to notice — clicks grew 25.4% but revenue grew 48.2%. That gap is the important bit. It means the revenue per click went up. We are not just getting more traffic — we are getting better traffic. Total spend was INR 77.53K, total revenue INR 220.96K. That is a 2.85x effective ROAS at portfolio level, with individual accounts ranging from 3.86x all the way to 6.4x.

SUMMARY

What These Numbers Mean in Practice

Rahul Pandey · Multi-Brand Portfolio

ACCOUNTS MANAGED	MONTHLY BUDGET	BEST ROAS	LOWEST ACOS
108+	**50-60L INR**	**6.4x**	**15.62%**
▲ Active brands	▲ Concurrent management	▲ Campaign 02	▼ Campaign 02

Managing five accounts simultaneously — each with distinct objectives, budgets, and category dynamics — requires more than technical platform knowledge. It requires a system: a repeatable process for monitoring performance across a portfolio, identifying which accounts need intervention versus which need protection, and making resource allocation decisions that serve the overall mandate rather than any single account in isolation.

The results documented in this portfolio reflect that system in action. Revenue grew meaningfully across all five accounts period-over-period. ACOS improved where efficiency was the objective. Scale was delivered where growth was the brief. And in each case, the outcomes were driven by data, not instinct — by structured testing frameworks, disciplined budget governance, and a genuine commercial focus on what the business needed from its media investment.

This is what paid media management looks like when it is done properly. Not a single campaign, not a single account — a portfolio, performing, with intent.
